### Machine Rating

- Lift breakout force (SAE)................................................................. 12232 N
- Tilt breakout force (SAE)............................................................... 12454 N
- Rated operating capacity (SAE J732)........................................ 600 kg
- Rated operating capacity with counterweight option.................. 635 kg
- Tipping load (SAE)...................................................................... 1179 kg
- Axle torque.................................................................................. 6373 Nm

### Function Time

- Raise lift arms........................................................................... 2.9 s
- Lower lift arms.......................................................................... 2.3 s
- Bucket rollback......................................................................... 2.0 s
- Bucket dump............................................................................. 2.3 s

### Weights

- Operating weight (SAE)............................................................. 2263 kg
- Shipping weight........................................................................ 2223 kg

### Engine

- Make / Model................................................................. Kubota / V2003–EB
- Fuel...................................................................................... Diesel
- Cooling..................................................................................... Liquid
- Power (SAE J1349 Net)......................................................... 32 kW
- Maximum governed RPM.................................................. 2650
- Torque at 1800 RPM (SAE Net)............................ 139 Nm
- Number of cylinders......................................................... 4
- Displacement.......................................................................... 2.2 l
- Bore....................................................................................... 87 mm
- Stroke.................................................................................... 92.4 mm
- Fuel consumption............................................................... 6.57 l/h (Estimated fuel consumption is based on testing by Bobcat Company in high duty-cycle digging applications.)
- Lubrication.......................................................... Pressure system with filter
- Crankcase ventilation......................................................... Open
- Air filter................................................................. Dry replaceable cartridge with safety element
- Ignition.............................................................................. Diesel-compression
- Starting aid.............................................................. Glow plugs

### Electrical

- Alternator.............................................................. Belt driven — 90 A — open
- Battery............................................................... 12V — 600 cold cranking A at -18°C — 115 min reserve capacity
- Starter............................................................. 12 V — gear reduction type — 2.7 kW
## Hydraulic System

- **Pump type.** Engine driven, gear type
- **Pump capacity at 2850 RPM – standard.** 60.2 l/min
- **System relief at Quick Couplers.** 172 to 179 Bar
- **Control valve.** Three-spool, open-centre type with float detent on lift and electrically controlled auxiliary spool
- **Hydraulic filter.** Full-flow replaceable — 3 µm synthetic media element
- **Fluid lines.** SAE standard tubelines, hoses, and fittings

## Hydraulic Cylinders

- **Lift cylinder (2).** Double-acting
- **Lift cylinder bore.** 50.8 mm
- **Lift cylinder rod.** 31.8 mm
- **Lift cylinder stroke.** 674.9 mm
- **Tilt cylinder (1).** Double-acting with cushioning feature on dump and rollback
- **Tilt cylinder bore.** 88.9 mm
- **Tilt cylinder rod.** 38.1 mm
- **Tilt cylinder stroke.** 368.3 mm

## Drive System

- **Transmission.** Infinitely variable tandem hydrostatic piston pumps, driving two fully reversing hydrostatic motors
- **Final drive chains.** Pre-stressed #80 HSOC endless roller chain (no master link) and sprockets in sealed chaincase with oil lubrication. (Chains do not require periodic adjustments.) Two chains per side with no idler sprocket.
- **Main drive.** Fully hydrostatic; four-wheel drive
- **Axle size.** 50.8 mm, heat treated
- **Wheel bolts.** Eight 9/16–inch wheel bolts fixed to axle hubs

## Traction

- **Standard tyres.** 10-16.5 — 4-ply
- **Travel speed.** 11.3 km/h
**Fluid Capacities**

Instrumentation

The following loader functions are monitored by a combination of gauges and warning lights in the operator's line of sight. The system alerts the operator of monitored loader malfunctions by way of audible alarm and visual warning lights.

**Standard Instrument Panel**

- **Gauges**
  - Engine coolant temperature
  - Fuel
  - Hour-meter

- **Indicators**
  - Attachment control device
  - BICS functions
  - Glow plugs

- **Warning lights**
  - Advanced Control System (ACS)
  - Engine air filter
  - Engine coolant temperature
  - Engine oil pressure
  - General warning
  - Hydraulic filter
  - Hydraulic oil temperature
  - Hydrostatic charge pressure
  - Seat belt
  - System voltage

**Deluxe Instrument Panel (Option)**

Same gauges, warning lights and other features as Standard Instrument Panel, plus:

- **Bar-type gauges**
  - Engine oil pressure
  - System voltage
  - Hydrostatic charge pressure
  - Hydraulic oil temperature

- **Additional features**
  - Keyless start with password capability
  - Digital clock
  - Job clock
  - Attachments information
  - Digital tachometer
  - High flow lockouts
  - Multi-language display
  - Help screens
  - Diagnostic capability
  - Engine/hydraulic systems shutdown function
Serviceability

Access is available to the following through the rear door/tailgate and rear screen:
- Air cleaner
- Alternator
- Battery
- Cooling system (engine oil and hydraulic oil coolers) for cleaning
- Engine oil and fuel filters
- Engine oil drain and dipstick
- Hydraulic oil fill (access at the side of the machine)
- Starter

Axle hubs provide protection for the axle seals
Bob-Tach™ pivots have replaceable wear bushings
Easy access to all lift arm grease points
Rod end of the tilt cylinder has a replaceable bushing
Tailgate has an optional lock for vandal-proofing
Tailgate is equipped with door-stop to hold door open while servicing
Tip-up operator cab gives access to certain hydraulic system components

Standard Features

- High-back cushion suspension seat
- Automatically activated glow-plugs
- Auxiliary hydraulics: variable flow/maximum flow
- Bob-Tach™ frame
- Bobcat Interlock Control System (BICS)
- Deluxe operator cab *
  - Includes interior cab foam, top and rear windows, accessory wire harness, dome light, and electrical power port
- Rear half side and top windows
- Engine/hydraulics system shutdown
- Hydraulic bucket positioning (including ON/Off switch)
- Instrumentation
- Lift arm support
- Operating lights, front and rear
- Parking brake
- Seat belt
- Seat bar
- Spark arrestor muffler
- Tyres — 10-16.5 — 8-ply — Bobcat standard duty
- CE certification
- Warranty: 12 months or 2000 hours

* Roll Over Protective Structure (ROPS) – meets requirements of SAE-J1040 and ISO 3471
Options

• Factory Options
  ◦ Deluxe instrument panel
  ◦ Cab enclosure with heat
  ◦ Heavy-duty tyres — 10-16.5 — 10-ply
  ◦ Heavy-duty tyres with offset rims — 10-16.5 — 10-ply
  ◦ Severe duty foam-filled tyres — 10-16.5 — 10-ply
  ◦ Super float tyres — 31-15.5 — 10-ply
  ◦ Severe duty tyres — 10-16.5 — 10-ply
  ◦ Segmented tyres, industrial type — 7.50-15
  ◦ Segmented tyres — 10-16.5
  ◦ Heavy duty, offset rim, tyre and wheel assembly — 10-16.5 — 10-ply
  ◦ Heavy duty tyre and wheel assembly — 10-16.5 — 10-ply
  ◦ Super float wheel and tyre assembly — 31-15.5 — 8-ply
  ◦ Heavy duty tyre and wheel assembly — 10-16.5 — 10-ply
  ◦ Segmented tyre, industrial type, left — 7.50-15
  ◦ Segmented tyre, industrial type, right — 7.50-15
  ◦ Segmented tyre, left — 10-16.5
  ◦ Segmented tyre, right — 10-16.5

• Dealer Installed Accessories
  ◦ Cab enclosure kit
  ◦ Special applications kit
  ◦ Counterweight kit
  ◦ Advanced Control System conversion kit
  ◦ 7-pin attachment control kit
  ◦ Replacement Bob-Tach™
  ◦ Catalytic purifier kit
  ◦ Fuel cap locking kit
  ◦ Deluxe instrument panel
  ◦ Door sensor switch kit
  ◦ Hydraulic bucket positioning kit
  ◦ Four-point lift kit
  ◦ Fresh air heater kit
  ◦ Front door kit
  ◦ Plumbing kit for fresh air heater
  ◦ Back up alarm kit
  ◦ FOPS kit **
  ◦ Single-point lift kit
  ◦ 7 and 14–pin electrical attachment control kit
  ◦ Replacement operator cab structure
  ◦ Operator cab, CE, enclosure kit
  ◦ Rear auxiliary hydraulic kit

** Falling Objects Protective Structure (FOPS) – meets requirements of SAE-J1043 and ISO 3449, Level I

Safety

Bobcat Interlock Control System (BICS), standard requires the operator to be seated in the loader with the seat bar in place and the engine running. After the operator presses the “Press to Operate Loader” button, the loader's hydraulic lift and tilt functions and traction drive can be operated.

Lift arm bypass control, standard used to lower the lift arms in the event that the lift arms cannot be lowered during normal operating conditions.

Seat belt, standard should always be worn when operating the loader. Three-point shoulder belt provides restraint for high range speeds.

Seat bar, standard secondary operator restraint, also serves as an arm rest.

Operator cab, standard an enclosed operator cab with side screens with a minimal inside cab width of 838 mm. Meets SAE-J1040 and ISO 3471 for Roll Over Protective Structure (ROPS) and SAE-J1043 and ISO 3449 Level I * for Falling Objects Protective Structure (FOPS). Level II ** option is available.

Lift arm support, standard use for servicing when lift arms are raised.

Parking brake, standard always set brake when leaving loader.

Grab handles, standard should always be used when entering/exiting loader.

Safety tread, standard slip resistant tread on lift arms and main frame to be used when entering/exiting loader.

Attachment steps, standard should always be used when entering/exiting loader.

Rear window, standard for emergency exit.

Front and rear working lights, standard use for indoor and low light operation.

Backup alarm, optional for use in areas with high traffic.

Lift kits, optional lift kits are available so loader may be lifted into remote areas.

Special applications kit, optional restricts objects and material from entering cab openings.

Operator’s handbook, standard weather-resistant operator handbook attached to the inside of the cab, providing operational instructions and warnings decals with pictorials and international symbols.

* Level I — Acceptance is intended for protection from falling bricks, small concrete blocks, and hand tools encountered in operations such as highway maintenance, landscaping, and other construction site services.

** Level II — Acceptance is intended for protection from falling trees or rocks for machines involved in site clearing, overhead demolition, or forestry.
